## MEMORANDUM

June 7, 2018

**To:** Nevada Board of Wildlife Commissioners, County Advisory Boards to Manage Wildlife, and Interested Publics

**From:** Brian Wakeling, Administrator, Game Division 

**Title:** **Commission Regulation 18 - 12, 2018–2019 Upland Game and Furbearer Seasons and Bag Limits – For Possible Action**

**Description:** The Commission will consider and may vote to establish regulations for upland game birds and mammals as well as furbearers for the 2018 and 2019 seasons. This regulation will also include fall wild turkey seasons for 2018 and 2019 and spring wild turkey seasons for 2019 and 2020.

**Presenter:** Wildlife Staff Specialists Shawn Espinosa and Russell Woolstenhulme

Summary:*Upland game*

Relatively few changes are recommended to upland game seasons and bag limits for 2018 and 2019. Sage-grouse season adjustments have been recommended to account for habitat loss and lower than average recruitment. For example, we are recommending closing all of Unit 068, largely due to the Rooster's Comb Fire in 2017. We are also recommending closing Unit 034 in Humboldt County due to low lek attendance and Unit 164 due to the failure to meet WAFWA hunt guidelines. In addition, we are recommending a shortened season for many Eureka County hunt units (e.g., Units 141, 144, and 145) due to lower lek attendance and direct and indirect habitat loss in Unit 141.

The Department is recommending a modification of application procedures for the Sheldon Special Sage-grouse Hunt so that our licensing vendor may provide an online process. Likewise,

free use permits to hunt Himalayan snowcock and report on harvest and observations will also be an online process for ease of data collection.

Turkey populations around the state appear to be doing well and we are recommending a slight increase in the number of turkey tags available along with additional junior hunt opportunities for Pershing County and Hunt Unit 152 of Lander County.

#### *Furbearer*

The Department is recommending no changes to furbearer seasons from those adopted by the Commission last year in June.

#### *Nevada bobcat data*

Bobcat data from the previous year's sample and data collection indicate state wide populations of bobcat are healthy within Nevada. Kitten production for the past year was 60 kittens/100 adult female, above the 10-year (55/100) and below the long-term (67/100) production rates. The three-year average for production is 83 kittens/100 females.

Adult male/female ratios (167 males/100 females) within the harvest were also excellent and above both 10-year (142/100) and long-term (143/100) ratios. The three-year average for adult male/female ratio is 159 males/100 females. Increased bobcat abundance was also indicated by a lower harvest effort of 133 trap nights/bobcat. This effort level is substantially lower than 10-year (202) and long-term (170) effort levels.

#### Recommendation:

The Department recommends that the Commission **VOTE TO APPROVE COMMISSION REGULATION 18 - 12, 2018–2019 UPLAND GAME AND FURBEARER SEASONS AND BAG LIMITS AS PRESENTED.**

# STATE OF NEVADA BOARD OF WILDLIFE COMMISSIONERS

The Board of Wildlife Commissioners under the authority of Section 501.181, 503.090, 503.140 and 503.245 of the Nevada Revised Statutes, does hereby adopt the following regulations for the management of game birds, small game, and furbearing mammals.
