Sample Results

- Detect > 0.50 µg/L TCE
(Values plotted only for wells that were sampled. Data from production wells are from samples collected under pumping conditions unless otherwise stated. Values plotted that are less than 0.50 µg/L are estimates. Estimates are either provided by the lab or represent averages of multiple samples that include values above and below the reporting limit.)
- ND Below Analytical Reporting Limit
- TCE Concentration Contour
 - > 0.50 µg/L > 10 µg/L
 - > 1.25 µg/L > 20 µg/L
 - > 2.5 µg/L > 40 µg/L
 - > 5 µg/L > 80 µg/L
- SS/FS TCE Concentration Contour
> 0.50 µg/L
(TCE Plume extent based on groundwater sampling results from Vista Canyon Group/CDM for the Sparks Sulfur Fuel Site. Sample results compiled from samples collected during 2013 O&M, or if none available, from most recent previous sampled event.)

The scale and configuration of all information shown herein are approximate only and are not intended as a guide for design or survey work. Reproduction is not permitted without prior written permission from the Washoe County Community Services Department.

Contours drawn using primarily June 2016 water level and PCE data. Contours may change as information from new or different wells is generated. Water level contours associated with pumping or recharging wells are schematic and may not accurately reflect actual piezometric surface.
