 The scale and configuration of all information shown herein are approximate only and are not intended as a guide for design or survey work. Reproduction or use without prior written permission from the Washington County Community Services Department.  
 Contours drawn using primarily water level and PCE data from the time range noted. Concentration contours are estimated based on the most recent field data available, and may not represent the actual extent of the contaminant plume. Groundwater flow directions associated with pumping or recharge wells are dynamic and may not reflect actual piezometric surface over the entire time range noted.
