To: Washoe County Planning Commission  
Re: Special Use Permit Case Number WSUP23-0003 (Praana Transmission Line)

Hello All,

I am the Trustee of the Hooper Family Trust and the Landowner of the APN's and lots mentioned in this proposal. I would like to say that this property has been in the Hooper Family for over 70 years and the Hooper Family has had residence in the Reno, Nevada area over the years. I am a 1971 Graduate of Wooster High School and also attended the University of Nevada-Reno. I have maintained contact with many Friends in Northern Nevada.

I have a special interest in providing Northern Nevada with Renewable Energy and in particular, Solar-Storage Power with the goal of fulfilling the State of Nevada's Goal of 100% Renewable Energy. I highly endorse the adoption and approval of this Special Use Permit Case Number WSUP23-0003 (Praana Transmission Line) which would help in the fulfillment of Nevada's 100% Renewable Energy Goal.

I highly encourage the Washoe County Planning Commission to approve this Special Use Permit.

Thank you,

Dr. Hooper

Public Comment for WSUP23-0003 Praana Transmission Line. The entire neighborhood of Rainbow Way and Fort Sage Rd is asking to please stop this construction project and move it farther away from the people to an area where no people are residing. Please find the attached official PDF letter to the county. Thank you

Neighborhood of Rainbow way and Fish Springs Rd request to please stop and move farther away the new construction project WSUP23-0003 (Praana Transmission Line)

Effects of Transmission Lines on Humans.

Short term Health Problems

1. Headaches
2. Fatigue
3. Anxiety
4. Insomnia
5. Prickling and/or burning skin
6. Rashes
7. Muscle pain

Long term Health Problems

Following serious health problems may arise due to electromagnetic field (EMF) effects on human Body.

1. Risk of damaging DNA

Our body acts like an energy wave broadcaster and receiver, incorporating and responding to EMFs. In fact, scientific research has demonstrated that every cell in your body may have its own EMF, helping to regulate important functions and keep you healthy. Strong, artificial EMFs like those from power lines can scramble and interfere with your body's natural EMF, harming everything from your sleep cycles and stress levels to your immune response and DNA.

2. Risk of Cancer and Leukemia

Researchers found that children living within 650 feet of power lines had a 70% greater risk for leukemia than children living 2000 feet away or more. (Studies available upon request.) We have children in the neighborhood and do not agree to exposing them to potential health risks from these transmission lines.

3. Risk of Neurodegenerative disease

4. Risk of Miscarriage

and more risks that we don't even know about. The worst part is that the power line company will not take any responsibility if people do start having health issues from the damaging effects of these transmission lines.

What are these transmission lines going to transmit?

What kind of electrical current or radiation will it transmit?

Why are these transmission lines so close to the street where there are a lot of people living on?

There is a lot of unoccupied land nearby what is the purpose to put these transmission lines so close to the people?

People in our neighborhood purposely left the city to get away from electromagnetic fields and the stress of the city. For what reason is the county trying to ruin a natural habitat and environment of this beautiful land by putting this monster power lines?

Just down the street on California border we already have huge power lines already standing. Adding more power lines so close together creates a fire hazard. Nature is unpredictable and so many power lines so close together could potentially create a disaster. As was mentioned before we have people, children and animals residing all near close proximity of this project and our safety should be main concern. Please put your construction project farther away from human beings and the rest of the neighborhood.

Thank you

Sincerely.

Hi Kat. I am not a Zoom person. And we can't be in Reno for the meeting. So I wanted to voice my opinion to you. My Name is Jim Linscott, I own property in the area of the Praana Transmission Line. My wife and I are wholeheartedly FOR it. We think it is the beginning of the highest and best use for the area. There are already some solar farms and lines up there . Please feel free to contact me .. I can be contacted by phone at 775-745-6474 or my e-mail - [Jim.linscott@icloud.com](mailto:Jim.linscott@icloud.com) Thank-you.
