

STRUCTURAL OBSERVATION AGREEMENT

The owner shall employ _____, Engineer of Record,
who agrees to provide services as described below for the project located at
_____ for permit
number _____

Structural observation is defined as the visual observation of the structural system beginning at the foundation stage and continuing through the completion of the structural system. This includes, but is not limited to, the elements and connections at significant stages. A written statement by the engineer of Record shall be submitted to the building official prior to each inspection by the Washoe County Department of Building and Safety as required under Section 108 of Washoe County Code, Chapter 100. The statement shall indicate that the site visits by the structural observer have been made at each completed stage, and that it is in general conformance with the structural requirements of the building code and the approved plans and specifications. The statement shall identify any reported deficiencies that have or have not, to the best of the structural observer's knowledge, been resolved.

Structural observation does not include or waive the responsibility for the inspections required by the Washoe county department of Building and Safety, or by Section 108 of the Uniform Building Code, or for the special inspection as required by Section 1701 of the Uniform Building Code, or as required by other sections of the code.
