## Washoe County Building Permit Checklist – Engineering Items

| eviewer: | Date:   | Project Description: |
|----------|---------|----------------------|
|          |         |                      |
| PN:      | Zoning: |                      |
|          |         |                      |
|          |         |                      |

**NOTE:** If a requirement begins with "No", checking the "True" box will be used to *confirm* the absence of something.

For example: "No Work in Right-of-Way"

- If you choose "True", it means "The statement is *Correct*, there is *NO* work to be done in the right-of-way"

- If you choose "False", it means "The statement is *Incorrect*, there *IS* work in the right-of-way"

For the entire checklist, a "False" answer will trigger the Permit Comment and will be required as a correction. The goal of the checklist is to have ZERO "False" boxes checked. If all "True" boxes [that apply] are checked, the permit should be approved.
