MEDIA PRODUCTION SPECIALIST

DEFINITION

Under general supervision, develops information and designs products to create positive relationships with the public through social media; and performs related duties as required.

EXPERIENCE AND TRAINING REQUIREMENTS

Three years of full-time experience designing products for social media including video, photography, print material, graphic design, audio, digital and website media, OR a combination of related education and experience.

LICENSE OR CERTIFICATES

Possession of a valid driver's license is required at the time of appointment.

SUPERVISION EXERCISED

Exercises no supervision.

EXAMPLES OF DUTIES (The following is used as a partial description and is not restrictive as to duties required.)

Design, coordinate and prioritize production projects and outreach products using video, audio, graphic design, print material, digital material and social media to create and maintain positive branding and perceptions of the assigned department, and to build public relations.

Perform maintenance and development on internal and external websites using current technology through digital signage systems.

Create logos, branding and illustrations, digital and print material to message information to target audience.

Consult with assigned project lead on subject material, script development, audio and lighting requirements, shooting location and equipment required to produce quality video. Discuss possible approaches for meeting staff needs, and assist with instructional design and development issues.

Design and produce graphics for video production including capturing images from live video or stills, developing graphics using paint-box or character generator programs, and creating sequences using 3D rendering and animation software.

Perform production tasks such as selecting site for shooting, checking site for power availability and accessibility, determining lighting requirements, transporting equipment to site, setting up props, and operating audio and video camera.

Review video footage to identify best takes; edit tapes, dub audio and videotapes and prepare final version for review.

Provide technical and creative assistance to production project leads, and provide instruction on the use of media equipment used for training, testing and classroom presentations.
Perform routine maintenance and troubleshooting on all video, audio and computer equipment used in the studio.

Analyze computer software and hardware needs, locate vendors and make purchases and install new software or upgrades.

Maintain broadcast standards by analyzing and adjusting the equipment utilizing test generators, waveform monitors, vectorscopes, digital meters and reference tapes.

Maintain library of technical and reference manuals for equipment used in the studio.

Videotape emergency and critical incident situations, maintain historical records, and provide staff with a visual review of the occurrences to use as an educational tool regarding specific results, injuries and property losses associated with the emergency or incident.
