CLASS SPECIFICATION

PLANS EXAMINER SUPERVISOR

DEFINITION

Under general direction, supervises the plans examining section of the Planning and Building Division; responsible for the review of permit plans and specifications to ensure completeness and compliance with building codes, federal and state laws and local ordinances; and performs related work as required.

EXPERIENCE AND TRAINING REQUIREMENTS

Five years of experience in building plans examination for code compliance. A bachelor’s degree from an accredited college or university in engineering or architectural design may be substituted for up to one half of the experience requirement.

LICENSE OR CERTIFICATE

A valid driver’s license is required at the time of appointment.

Must possess an ICC Combination Inspector certification and ICC Building Plans Examiner certification; OR an ICC Master Code Professional certification or a recognized equivalent certification at the time of application.

Must obtain an ICC Building Official or Building Code Official certification within one year of appointment.

SUPERVISION EXERCISED

Exercises direct supervision over Plans Examiners and support staff.

EXAMPLES OF DUTIES (The following is used as a partial description and is not restrictive as to duties required.)

Plan, organize and supervise the work of staff engaged in plans examining and review, which includes training, work assignment, scheduling and review of work, employee development, discipline and writing performance evaluations.

Provide input and recommendations with the formulation of Department policies and programs, which includes conducting technical research, planning, and implementing goals and objectives, setting performance standards for streamlining plan approval processes and making budget recommendations.

Meet with owner-builders, contractors, design professionals and other government agencies to review and make corrections on projects ensuring compliance with building codes and expediting the plan review process.

Review the more complex drawings, specifications and applications for building permits by checking engineering calculations on structural design, life-safety issues, ADA and building systems, including energy compliance submitted by owner-builders, contractors and design professionals for completeness and conformance with applicable building codes, federal and state laws and local ordinances.

Provide lead experience and expertise to the plans examiner section for commercial, industrial and residential projects and structures for difficult and complex plan reviews.

Answer technical questions relating to building codes and County policies to assist the public and contractors with
the construction process.

Research technical manuals to ensure compliance with established standards, and evaluate performance or alternate materials and methods proposed by applicants.

Code data for tracking building permits and coordinating the plan review process with other divisions and government agencies.

Prepare letters providing explanations of plan corrections or denials and technical interpretations of building codes, federal and state laws and local ordinances.

Ensure that assigned staff performs assignments and reviews in a competent and professional manner that minimizes the County and applicants risk and liability.
