NEVADA SHARED RADIO SYSTEM DESIGN – POOR COVERAGE AREAS AND NEW SITES

April 20, 2018
800 MHz
Joint Operating Committee
As part of the NSRS design process Washoe County is considering areas of poor radio coverage.

- Anecdotal evidence of poor coverage is validated by coverage models OR Vice Versa.

New radio sites are a solution to reduce areas of poor coverage in and adjacent to populated areas.
Galena High and adjacent neighborhood; Franktown
Golden Eagle Park and Future Development
Red Rock – Rancho Haven
Northern Pyramid lake
Vya
Next Steps

- Washoe County (WC) has provided candidate sites to Harris Corp. for modeling.
  - No site for Stonegate.
  - Possible Red Peak move.
  - When modeling is complete WC will assess results to confirm areas of poor coverage are addressed.

- **Greenfield sites add substantially to the cost of the new radio system.**

- **JOC: Provide input on areas of poor coverage.**
  - **Possible action:** Request agency input on areas of poor coverage.
