

Be Proactive and Prepared

Make your Home Fire Safe

Defensible Space Assessment Community Program

Truckee Meadows Fire Protection District (TMFPD) is conducting home defensible space assessments to help our community be proactive in protecting your family and property from wildfire. Trained assessors from the department will perform an assessment of properties throughout the District to provide a personalized on-site guided evaluation of your home and property. Informational tips and nationally recognized resources will be provided to educate you about areas in and around your home that are vulnerable to wildfire.

This is a FREE public service that is being brought to you by TMFPD. All assessment information is based upon recommendations published by the National Fire Protection Association, Nevada Network of Fire Adaptive Communities, State Fire Marshal, and Truckee Meadows Fire Protection District.

To request your FREE site assessment, please contact Truckee Meadows Fire Protection District at 775.326.6000 or info@tmfpd.us.
